NEW ANTIFOULING

RANGE EVOLVING

NEW ANTIFOULING

RANGE EVOLVING

Our affinity with the requirements of every customer motivates us to develop state-of-the-art painting products that are the results of selected raw materials, formulas compliant with the most recent regulations and production processes guaranteeing constant quality. This is the reason why the R&D laboratory of Boero YachtCoatings has developed a new antifouling range, compliant with the upcoming BPR European regulation, which will come into force in 2018:

Range of antifouling for professional use

EXTRA

Range of antifouling for DIY and/or professional use

PLUS

WHAT IS BPR?

It is a European regulation about biocides (Biocidal Products Regulation) that, because of their very nature, can cause damage to humans, to animals and/or to the environment.

For this reason, the BPR dictates detailed rules about the performance of risk assessment and about the way companies are bound to obtain permits from competent authorities to be allowed to introduce the biocides used in their antifouling on the market.

SAVE THE DATE

Antifouling not compliant with the BPR regulation may be introduced on the market until 30 June 2018. This is valid for both wholesalers and retailers.

Final users may use antifouling not compliant with the BPR regulation until 31 December 2018. After such date, the user must make sure not to use this type of product any more.

ARE THE NEW ANTIFOULING COMPATIBLE WITH PREVIOUS FORMULATIONS?

Yes, all the new antifouling are compatible with previous formulations; it is then possible to proceed with the new antifouling as long as the existing ones are in good condition.

ARE THERE ANY CHANGES IN THE APPLICATION METHOD?

No, the tools used to apply the new range of BPR-compliant antifouling are the same that were used before brush, roller and airless spray (for professional use only).

Altura 619 PLUS

Hard matrix antifouling with high copper content for excellent protection over time

Suitable for any type of boat in GRP, steel and wood, including high-speed power boats

For Professional and DIY

Altura 619 EXTRA
