THE SECRET OF A MASTERPIECE

Improving performance is part of our DNA.

This quest for perfection has guided our approach for decades,
to offer the market the quality of a masterpiece.

It involves cutting-edge technology that improves the performance of boats,
a sense of style that enhances their beauty, and ultimate performance
that redefines the standards of excellence.

EXCELLENCE COMES ON BOARD

Experience, innovation, beauty.
Much more than what you see.

Choosing Boero YachtCoatings opens up a world of absolute values.

The know-how of a storied company with a wealth of experience gained

as a leading producer of industry-beating coating products.

The expertise chosen by top shipyards to protect and decorate
the world's finest yachts and superyachts.

The all-Italian pleasure of sharing the experience by supporting
customers throughout the entire production process.

Boero YachtCoatings has worked on over 700 superyachts worldwide,
providing more than 700,000 square metres of protection for leading international
shipyards: Azimut | Benetti Group, Baglietto, Codecasa, Columbus Yachts, CRN,
Isa Yachts, Perini Navi, Sanlorenzo, Tankoa Yachts.

EVERY ACHIEVEMENT IS THE START OF A NEW CHALLENGE

Progress is pushing boundaries
and having the ability to go beyond them.

For Boero YachtCoatings, every achievement is a new start. This translates into the careful selection of raw materials and meticulous control over every coating system, ensuring unbeatable performance for every product. But it also means compliance with the highest international standards, efficiency and cutting-edge logistics, from production and storage to the shipment of the end product.

We settle only for perfection, nothing less. And don't take our word for it.

OUR INTEGRATED QUALITY, ENVIRONMENT AND WORKPLACE
HEALTH & SAFETY SYSTEM IS CERTIFIED BY RINA.

BEAUTY KNOWS NO BOUNDS

Transforming colour into a work of art,
to express a unique personality on the water too.

Italy is the birthplace of beauty, which is why for us it is an absolute value.

This passion is the driving force behind research to align the world of colours with new style

trends, but also to extend the product range and explore new expressive horizons.

It is a research effort that aims to make outstandingly attractive boats even more beautiful,

so that their owners can make a unique personal statement.

AN ISLAND OF PROGRESS

A dedicated R&D centre, a talented team and pioneering research.

The beating heart of the Boero YachtCoatings research effort is the "Riccardo Cavalleroni" R&D centre, with two dedicated research units and two technical training centres for the two business units, Architecture & Deco and Yachting.

The Yachting area drives the future of production processes and new coating systems.

The division has established partnerships with research centres and universities recognised at European and global level: RISE Research Institutes of Sweden, Göteborg University, Portsmouth University, CNR, Politecnico di Milano and others.

These partnerships have contributed to professional training for a team of top researchers and engineers. Seen as one of the brand's key assets, the team creates specific types of products on an ad hoc basis for the yachting industry.

The areas of study are product innovation (smart coatings, sustainability, green chemistry), the integration of new technology into production processes, the reduction of the environmental impact, and important certifications.

The scientific research undertaken by Boero YachtCoatings is applied across the product range, combining top performance with an ongoing focus on environment and legal regulations.

1,500 SQUARE METRES OF SURFACE AREA
40 TECHNICAL AND RESEARCH SPECIALISTS
OVER 2,500 PRODUCT TESTS EVERY YEAR
OVER 450,000 TINTING FORMULAS

BOERO YACHTCOATINGS PRODUCTION

120,000 SQUARE METRES OF PRODUCTION FACILITY

12,000 SQUARE METRES FOR PRODUCTION

6,000 SQUARE METRES FOR WAREHOUSES AND THE SERVICE CENTRE

7,000 DIFFERENT PRODUCTS MANAGED EVERY YEAR

800 RAW MATERIALS

90 INTENSIVE STORAGE TANKS AND SILOS

350 TANKS FOR PRODUCTION

31 PACKAGING LINES

SPACE FOR INNOVATION

**120,000 square metres of production facility.
Great efficiency needs great size.**

Gruppo Boero production site, opened in 2009, is in Italy, in Rivalta Scrivia near Tortona, Italy.

Over 7,000 different products are managed every year in a total area of 120,000 square metres,

12,000 of which are dedicated to production and 6,000 to warehouses and services.

The factory, one of the most important production facilities for the paint and coating industry

in Europe, makes use of advanced process technology, ensures high quality standards

for end products, and provides industry-beating logistics services that make

Boero YachtCoatings a leader on the superyacht market.

TOP-RANKING ITALIAN GROUP IN THE INDUSTRY
20 MILLION LITRES PRODUCED ANNUALLY
450 EMPLOYEES AND ASSOCIATES

AN ITALIAN STORY

From Gruppo Boero to Boero YachtCoatings.
Through three centuries of innovation.

Over 190 years of history: another Gruppo Boero record.

The business began life in 1831 with the acquisition of a small factory that made white lead powder. The rest is history. As far back as the early 1900s, a finely-honed business sense combined with leading edge technology drove rapid growth in paint production for the construction industry. In the 1970s, ahead of its time, the professional expertise gained by the company over the years encouraged it to invest in and develop a Business Unit devoted exclusively to the yacht segment. As a result, Gruppo Boero today holds a position of leadership in two strategic sectors: Architecture & Deco and Yachting. Today, Gruppo Boero is an integrated company that continues to develop expertise and add value across all business processes: research, innovation, production, distribution, assistance and care for the environment. An inborn desire for improvement to offer the market the extraordinary experience of absolute quality.

SUPERYACHT PAINT SYSTEM

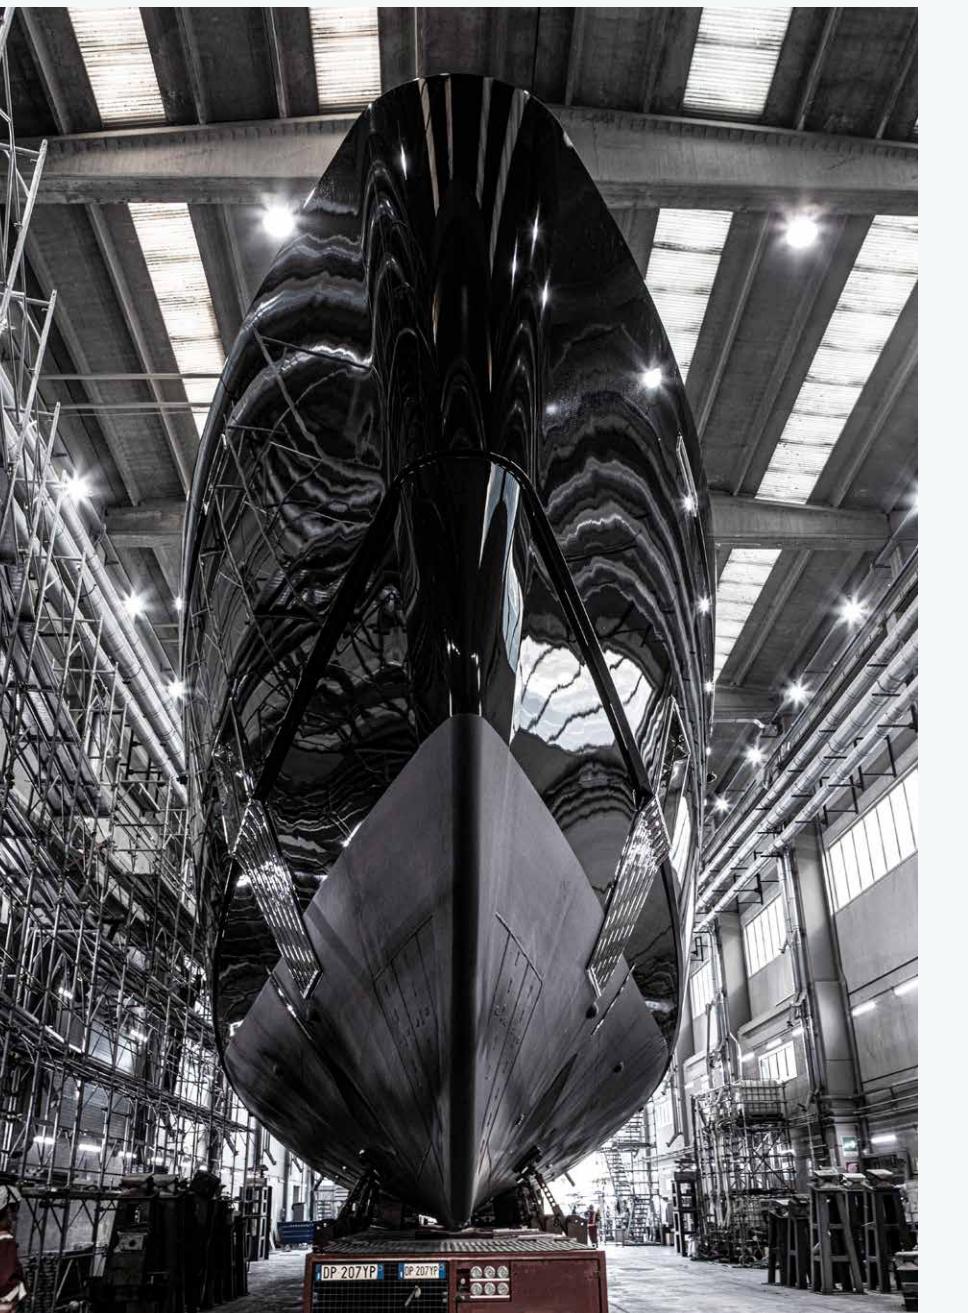

A JOURNEY TOGETHER

An all-embracing experience
working side-by-side with every customer.

The Superyacht Paint System establishes a next level partnership:

- supporting the shipyard at every stage of the superyacht construction process and providing expert, highly qualified guidance throughout the production cycle;
- putting owners at the centre of the design process right from the shipyard, to turn their vision into reality;
- customising the paint system for each individual customer, to enhance the beauty and performance of every hull.

KNOW-HOW THAT KNOWS HOW TO SATISFY

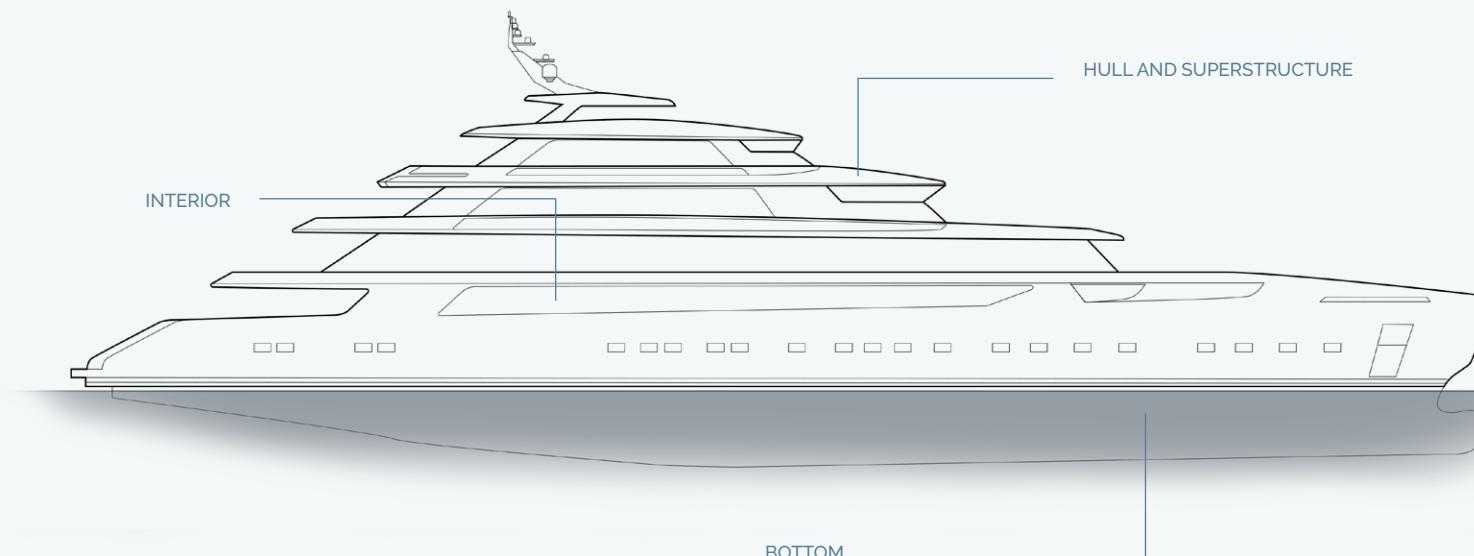

When knowledge becomes art.

The Superyacht Paint System is specialist know-how across the board:

- a deep understanding of paint systems gained from working with leading superyacht shipyards around the world;
- a paint cycle for all types of boat (aluminium, steel, fibreglass, composite materials and wood) that delivers the highest level of performance in terms of flexibility, reliability, durability and low specific weight.

IF A SUPERYACHT COULD CHOOSE

The Superyacht Paint System is the quality that a superyacht deserves: state-of-the-art coating products formulated with selected raw materials and in line with the latest regulations.

HULL AND SUPERSTRUCTURE

DELTA 3000

Top quality self-polishing antifouling
Long life antifouling paint containing copper compounds

* The products contain active substances compliant with the BPR regulation (EU) No. 528/2012

CHALLENGER PRO

200,000 + METALLIC, PEARL AND PASTEL TINTS

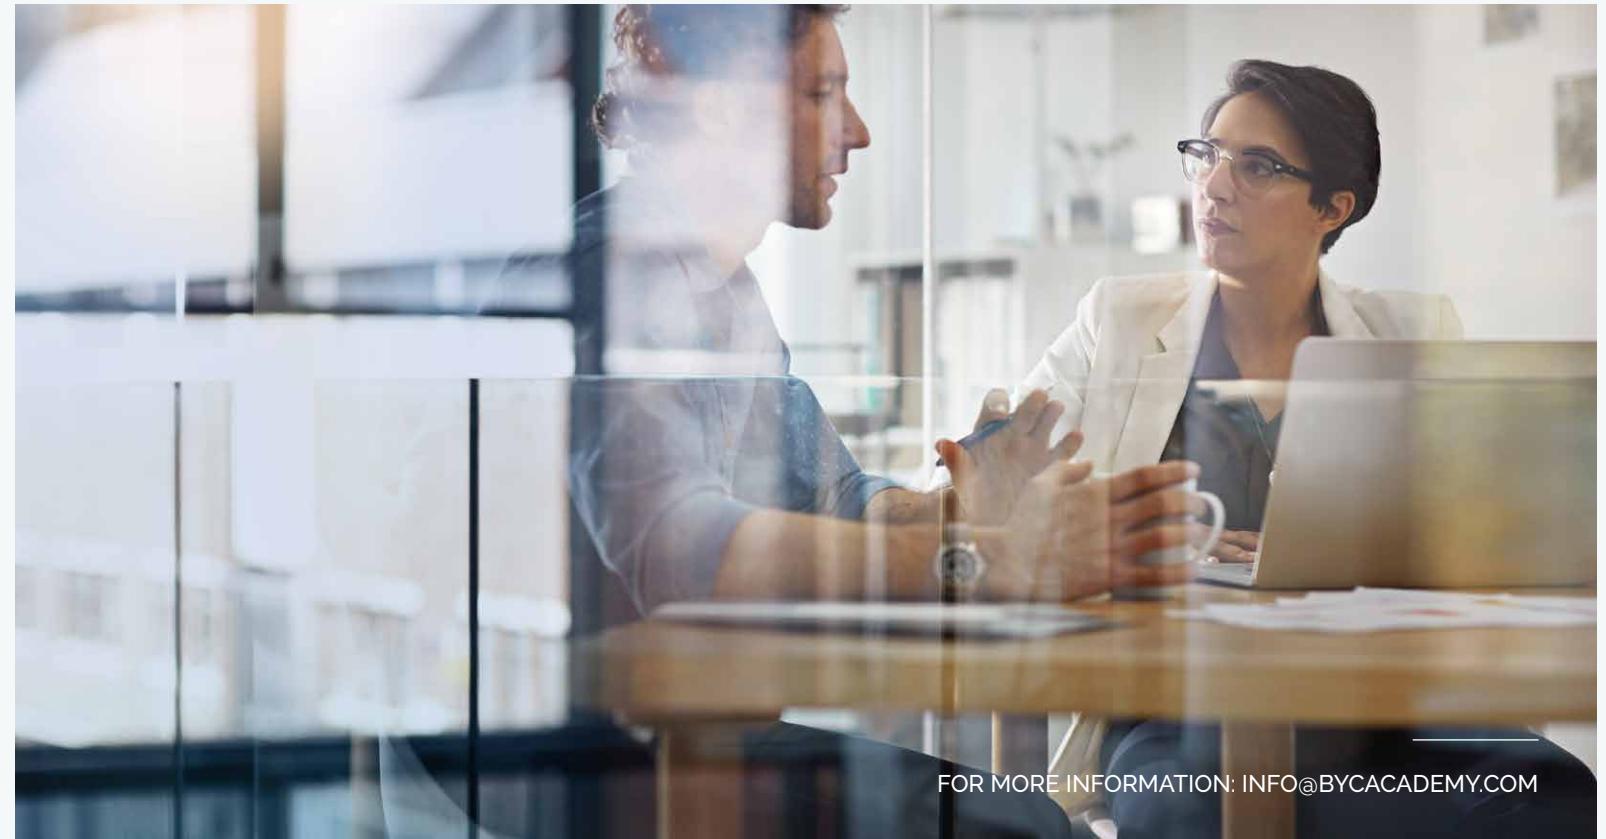

SCHOOL OF EXCELLENCE

A way to share the most valuable asset:
knowledge.

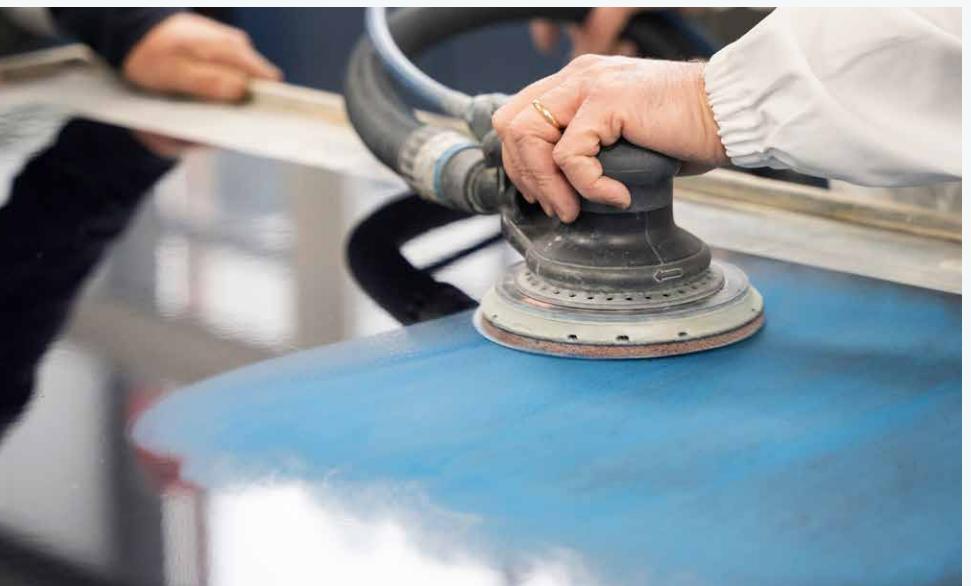

In an increasingly competitive and demanding industry, it is essential to invest in people, transferring expertise to cultivate their individual skills by working not only with surveyors, project managers and owner representatives, but also with captains and crews, to obtain the best performance from the coating products used.

This is the driving force behind the BYCacademy, a training programme created to share solutions, ideas and best practices, and to activate action learning processes in all subject areas involved, from the hull to the top side. The final goal is to be able to tackle real problems, solving them with superior quality solutions for both new builds and refitting projects.

Boero YachtCoatings, with its select team of specialists, is available to support and supervise application technicians step by step in the yard, throughout the coating cycle, transferring the best methods and techniques for every stage of production and obtaining the best possible results from each individual product.

FOR MORE INFORMATION: INFO@BYCACADEMY.COM

THE REASON FOR OUR SUCCESS

The world speaks for us.

For over 50 years, top shipyards have chosen to rely on the experience, competence and professionalism of Boero YachtCoatings. Azimut | Benetti Group, Baglietto, Codecasa, Columbus Yachts, CRN, Isa Yachts, Perini Navi, Sanlorenzo, Tankoa Yachts.

A success story driven by passion, performance and reliability that has made Boero YachtCoatings the benchmark in the world of professional coating products.

"I chose Boero products because I remember my father using Boero antifouling and topcoat for his boat when I was young. Then, when I entered the world of yachting, I began to appreciate their quality.

I remember the various products, from Challenger to Altura. Then I started to get to know and talk to the company's consultants, which reinforced my attachment to the product. I feel very confident with the products because they are reliable and durable, as well as being Italian.

The company's strengths are the support and advice provided by its technical staff. In practice, when you have to apply antifouling or other types of coating, their technical consultant is always available and the advice is impeccable.

I wouldn't hesitate to advise a colleague to try it."

"Boero's strengths are Italian made products, reliability, and excellent technical advice that is always prompt and professional when difficult hull situations are involved.

The huge range of products, the technical data sheets with clear instructions for use, and the customer service make Boero a reliable Italian company."

Gino Battaglia
Superyacht Captain M/Y Plan B 73,
President, ItalianYachtMasters Association

"For approximately 20 years, Storm has collaborated with the world's principal superyacht manufacturers, arriving where we are today as the main applicator for the world's top two superyacht constructors.

Our main objective has always been to produce the highest possible standard with the best possible management of the process. This is something we have done hand in hand with Boero YachtCoatings throughout our journey.

We trust the Boero YachtCoatings product and the excellent technical and commercial support we have constantly received during these exciting and educating 20 years."

David Fryer and Malcolm Kerr
Superyacht Paint Applicators, Kano Srl & Storm Srl

"We are very satisfied with our partnership with Boero YachtCoatings, which represents Italian excellence in the yachting industry. The products used during the coating cycle give the Tecnomar Evo 120's hull a perfect, uniform sheen that reflects the water, enhancing the colours and the yacht's elegant aesthetic."

Marco Figara
Production Director, The Italian Sea Group

"I have been using Boero products, mainly antifouling, for over 15 years on all the boats under my command. The antifouling has always performed excellently, even when applied over competing products already on the hull. My navigation areas in recent years have mainly been in the Mediterranean, involving long cruises on boats with an average speed of between 13 and 30 knots, and I have never had problems of any type, not least because of the advice provided by Boero's technical consultants before the application of the product. I particularly remember one episode of a yacht dry-docked after a period of two years, and even in that case the performance of the antifouling lived up to expectations. To my amazement, there were no accumulations of barnacles, but only a slight formation of algae along the waterline."

Pierluigi Ippoliti
Master 3000 Gt

"I live my ship with passion, sailing frequently and sometimes for long periods. That is why I take an interest in every single technical aspect of the boat and use innovative products that guarantee optimum performance and great reliability. For years I have been protecting my hull with Boero YachtCoatings antifouling and the results have always been excellent, living up to my expectations. An excellent product and impeccable consulting."

Luca R.
Superyacht Owner, MY Miamaa

OVERMARINE	M/Y	OPEN 40	40	2006
PERINI NAVI	S/Y	...IS A ROSE	50	2003

"I personally supervised the construction of MY Miamaa, step by step. This superyacht is born to be at sea, in comfort and safety. I was familiar with Boero YachtCoatings products and didn't hesitate when they were suggested. Today, many miles of cruising later, I can say categorically that it was a great choice."

Andrea Segato
Superyacht Captain, MY Miamaa

"We have been working with Gruppo Boero for over 35 years. BoeroYachtCoatings products deliver excellent results, which are a basic requirement for our clients and their boats. That is why Boero YachtCoatings is the number one partner of boat builder Sanlorenzo for anti-corrosion and filler systems."

"We have decades of experience working in the area of finishings and machining projects for superyachts. Our know-how in application processes, surface treatment and every stage in the paint system is our most valuable asset. For everything else we rely on the quality of Boero YachtCoatings to obtain the results that our most demanding customers expect."

Gaetano Vella
