

ASSURED SUPERYACHT PROTECTION

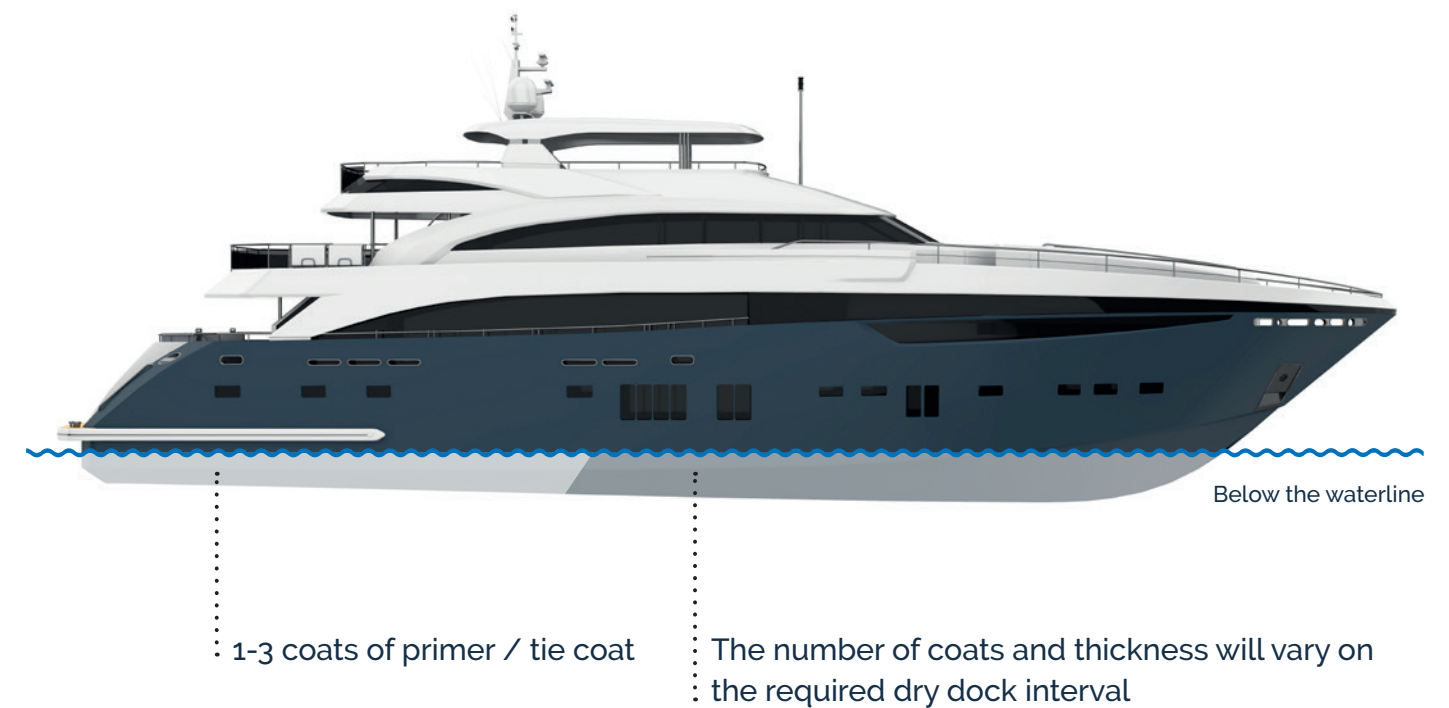

YachtCoatings

Boero LifeCycle

An integrated and comprehensive range of customised coating solutions to meet the most complex requirements. We promote the Boero Lifecycle with a dedicated team, focused on the best maintenance and aftersales service to superyacht: shipyards, captains and management, offering global supply, product information, warranty and service. We support the Boero Lifecycle with our technical sales support team, offering practical coatings advice, specification, inspection and various levels of training.

Underwater Coating Solution

Primer / Tie Coat

Defender – Cod. 700.613

Multi-use modified epoxy primer

0,75 Lt - 2,5 Lt - 10 Lt

- **Two-component modified epoxy primer:** With anti-corrosive properties, which can be used as a multi-purpose primer and as an anti-fouling tie coat.
- **High versatility:** Suitable for application on various substrates, including steel, aluminum, wood, composite and fibreglass, both above and below the waterline, as well as for interiors.
- **Extended overcoating time without sanding:** Can be overcoated with any type of Boero anti-fouling with a maximum interval of 3 months without sanding, simplifying maintenance operations.
- **High-build formulation with barrier protection:** Contains mica platelets & anti-corrosive pigments that form a multi-layer active barrier, enhancing protection against corrosion and osmosis.
- **Certifications:** LFS MED class II certified, ensuring compliance with maritime safety standards.

Anti-foulings

Magellan 630 Extra – Cod. 70E.630

Premium SPC anti-fouling, developed with innovative Silyl Acrylate technology

5 Lt - 15 Lt

- **Premium SPC anti-fouling with co-biocide:** With maximum protection against aggressive fouling, with controlled biocide release, providing protection for up to 3 years on all hull materials.
- **Lower environmental impact:** the unique combination of special biocides do not create bioaccumulation*** during the service life of the product, which means once in contact with seawater, the elements rapidly degrade to non-toxic materials avoiding long-term presence in the ocean.
- **Silyl Acrylate technology:** offers smooth hull surfaces, reducing friction for optimized fuel consumption and the reduction of emissions (CO₂).
- **Certifications:** Compliant with IMO regulations (AFS/CONF/26) and certified by Lloyd's and RINA as TBT-free and Cybutryne-free.

201 Black

Giraglia 633 Extra – Cod. 70E.633

Premium self-polishing anti-fouling with co-biocide

5 Lt - 15 Lt

- **Premium self-polishing anti-fouling with co-biocide:** Ensures excellent performance through controlled release of biocides and co-biocides, protecting the underwater hull from marine fouling settlement.
- **Extended protection:** Provides protection for up to 36 months, reducing the frequency of maintenance interventions.
- **Material versatility:** Suitable for steel, composite, wood and aluminium** hulls.
- **Certifications:** Compliant with IMO regulations (AFS/CONF/26) and certified by Lloyd's and RINA as TBT-free and Cybutryne-free.

201 Black

Altura 619 Extra – Cod. 70E.619

Premium hard anti-fouling with co-biocide

5 Lt - 15 Lt

- **High copper content:** Ensures effective protection for submerged hulls against marine fouling growth.
- **Controlled release of biocides and synergistic co-biocides:** Provides prolonged protection for up to 36 months, reducing the frequency of maintenance.
- **Reduced leaching layer:** Prevents paint layer buildup, maintaining a smooth and efficient hull over time.
- **Versatility:** Suitable for steel, composite, wood and aluminium** hulls.
- **Certifications:** Compliant with IMO regulations (AFS/CONF/26) and certified by Lloyd's and RINA as free from TBT and Cybutryne-free.

* Only 5 Lt

** Aluminium hulls should be properly prepared with a min. of 300 microns of epoxy primer

*** Bioaccumulation is the process of gradual accumulation of a substance, such as chemicals, in an organism

Tank coatings

Boero Fresh Water EU – Cod. 700.910

True solvent-free epoxy tank coating

5 Lt

- **Two component tank coating:** specifically formulated for freshwater tanks
- **Zero VOC:** as a true solvent-free formulation and is virtually odourless
- **Easy application:** applied by airless and brush & roller for stripe coating
- **Wide range of substrates:** suitable for steel, aluminium and composites, with excellent adhesion
- **Potable water certification:** RINA in compliance with DM 174/2004

001 White

051 Grey

Boero Grey Water – Cod. 700.903

High solids modified epoxy tank coating

5 Lt

- **Two component tank coating:** suitable for Grey and Black water tanks
- **Suitable for range of tanks:** specifically formulated with excellent chemical resistance.
- **Easy application:** applied by airless and brush & roller for stripe coating
- **Wide range of substrates:** suitable for steel, aluminium and composites, with excellent adhesion

Warranty

Boero is committed to delivering quality products that meet the highest standards of performance and reliability.

Our Warranty System is designed to ensure our customer have maximum protection and peace of mind.

- ✓ Reduce risk
- ✓ Provide security and assurance
- ✓ Enhance customer satisfaction

We offer:

Comprehensive coverage and warranty options -

- Anti-fouling protection up to **36** months
- Anti-corrosive protection up to **60** months
- Topcoat protection of up to **48** months

Dedicated customer support team

We have developed a comprehensive warranty program supporting our customers as while we are confident in our products, we understand that the unexpected can happen.

Speak to your local Boero Representative or the Boero Maintenance Team to discuss your requirements for a custom specification and warranty offer, which we believe is the best in the superyacht industry today.

Technical Sales Support

Our Technical Sales Support goes beyond selling products; we provide guidance to our customers on product selection and application while conforming to the project coating specification.

The field service is provided by the Boero Coating Advisors, a highly skilled and experienced team dedicated to technical sales support, strategically located in the main hubs in the yachting market.

The Boero Coating Advisors are certified by FROSIO or NACE and RMCI, using this in assisting our customers by providing coating solutions, optimizing processes with dedicated coating specifications and trainings, and act as a link with the Boero R&D team for product development, application and testing.

Global service

Boero Dealers are our trusted partners, supporting both the yacht and superyacht markets in more than 15 countries.

The Boero Dealer & Distributor network is continually expanding, ensuring that we can offer our customers easy access to the complete Boero Product range, extended service and support in the key yachting areas and countries.

Training Academy

The innovative training hub of Gruppo Boero

Gruppo Boero Academy is a knowledge-sharing centre for the education and training of customers and staff. The Academy offers both theory and practical courses in many specialist area of yacht coatings, from yachting product range induction to specialist spray finishes. The fully equipped training centre has all the latest application tools and equipment for the demonstration of a single specialist product to the full range of a typical yacht coating systems. Highly qualified trainers are on hand to introduce the products, demonstrate, train or guide on the best application methods to ensure the best possible results from the wide range of product technologies.

Courses and sessions are developed for a full customer demographic from dealers, sales teams, shipyards, applicators, project managers and yacht crew, with training held at Gruppo Boero Academy in Rivalta Scrivia (AL) – Italy, on-site and online.
